## Expert Solutions for Optical Filter Assemblies

From laminating and mounting to custom assemblies, Chroma's expertise ensures precision and reliability for your most critical applications. Committed to collaboration, we work closely with you to optimize both performance and cost. Rely on Chroma for versatile assembly solutions that deliver peak performance.

Visit us at SPIE Optics + Photonics booth #430 or learn more today at [chroma.com/capabilities](http://chroma.com/capabilities)

## One size doesn't fit all

That's why at Chroma, we collaborate with industry leaders to deliver custom optical filter solutions that meet their exact specifications.

Whether it's for aerospace, the life sciences, or another highly specialized application, Chroma filters are engineered to optimize your system's performance. From off-the-shelf products to custom designs, we have the expertise and capacity to meet your needs, no matter the scale.

**Services Available:**

- **Catalog Filters:** In-stock and ready to ship for common wavelengths and uses.
- **Custom Designs:** Work with us to create the ideal filter solution for your needs.
- **Engineering Support:** Gain access to expert advice for a range of industries.
- **Assembly:** Precision assembly services to integrate filters into your system.
- **Rapid Prototyping:** Custom designs delivered fast to keep your project on track.
